# ELEMENTS OF A SUCCESSFUL MEDICAID RECOVERY PROGRAM
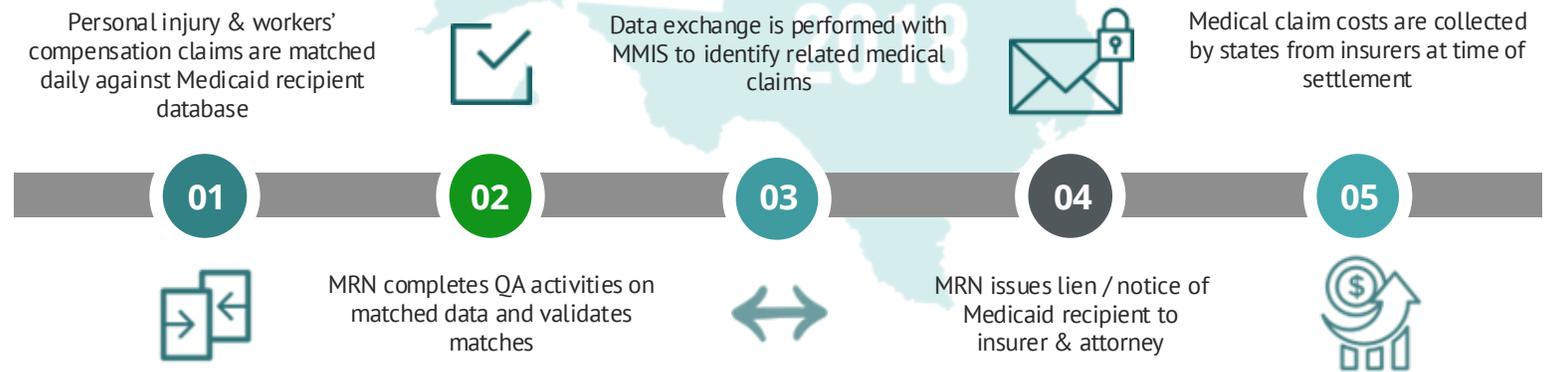

**Medicaid**
Recovery Network
*by* STELLARWARE CORPORATION

## ORIGIN & MECHANICS

The **Medicaid Recovery Network (MRN)**, originally the Medical Assistance Intercept System (MAIS), was designed to address Article 11 of the Rhode Island FY13 Budget law (P.L. 2012, Ch. 241), which created R.I.G.L. Chapter 27-57.1, the Medical Assistance Intercept Act. **The daily electronic matching of Medicaid recipients with liability and workers' compensation claims allows MRN to easily identify qualified claims early in the claim lifecycle and as a result, allows states to recover greater medical claim costs from insurers at the time of settlement.** Rhode Island was the first member to join the program in **2012**, followed by **Texas** in **2018**. Since its launch, MRN has become an invaluable solution for states to mitigate overall medical assistance claim costs.

Personal injury & workers' compensation claims are matched daily against Medicaid recipient database

Data exchange is performed with MMIS to identify related medical claims

Medical claim costs are collected by states from insurers at time of settlement

**01** **02** **03** **04** **05**

MRN completes QA activities on matched data and validates matches

MRN issues lien / notice of Medicaid recipient to insurer & attorney

## FEATURES

**Robust Data Matching**
Matches with a database of over 1.7 billion claims from the insurance industry daily

**Interactive Look-Up Function**
Using MRN's lookup function, insurers and attorneys can see whether claimants are on Medicaid in real-time

## PERFORMANCE

**4.9M**
Overall insurance claims processed

**11.2M+**
Medicaid recipients in the system

**458K+**
Notices of subrogation generated

## QUALITY ASSURANCE

MRN's **rigorous** QA process ensures the **highest level of qualified, matched claims**, verifying claim status as well as insurer and attorney contact information.

QUALITY APPROVED CONTROL

## COST BENEFIT ANALYSIS

The MRN program practically pays for itself with a return-on-investment as high as

**10:1**

States using MRN have realized, and continue to realize, **significant cost savings** on behalf of their department(s)

## THE MRN ADVANTAGE

MRN's claims workflow has a **lifecycle of 2-7 days** whereas other subrogation processes extend well beyond 130+ days
